

# Let Your Students Learn About How They Hear

The focus of the next Go Zone topic – Listen Very Carefully – is sound and hearing; what sound is, how ears can hear, how different sounds can damage our ears, how to protect our ears and what happens when people lose their hearing.

This topic will also cover:

- What is sound and what makes sounds
- Vibrations, sound waves and experiments
- How our ears 'catch' sounds and how we hear
- How hearing keeps us safe
- Measuring sounds, loud sounds and potential dangers
- Protecting our ears
- Hearing loss, deafness, communicating, sign language, hearing dogs

'Listen Very Carefully' has fantastic activities and experiments to help your students learn how their hearing works. This topic works in perfectly with New Zealand Sign Language Week 2-8 May 2010; contact NiE today to secure your order.

#### Curriculum Level 2

##### Science (Level 1-2)

**Strand:** Physical World

**AO:** Explore everyday examples of physical phenomena, such a sound.

##### Health (Level 2)

**AO:** Identify risk and use safe practices in a range of contexts.

**AO:** Contribute to and use simple guidelines and practices that promote physically and socially healthy classrooms, schools, and local environments.

## BONUS!

Teachers ordering a class set receive a free class set of newspapers and free teachers' notes!

#### LISTEN VERY CAREFULLY
